**2.NAME:** ANKITH GOWDA B S

**SRN:** PES2UG22CS077

HOME PAGE

We are Making a Webpage For Live Online HTML CSS And JavaScript Compiler Which Allows Users To See The Output Of There Code Without Even Reloading Or Saving The Page Every Time They Make Changes In The Code As We Are Using Backend to Update the Output Every Time Something Changes made in the Code.

**CODE AREA:** This area contains a text area for users to input their HTML, CSS, and JavaScript code.

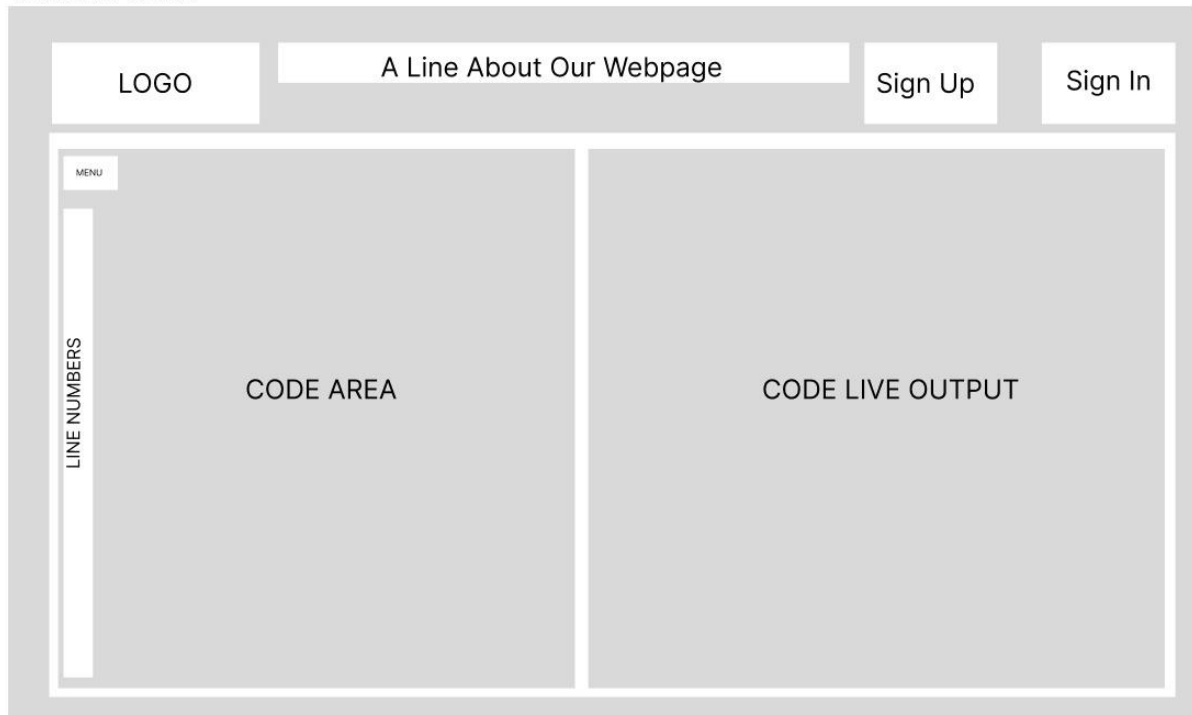

**CODE LIVE OUTPUT:** This area displays the output.

We Are Also Aiming to Provide It for Mobile Users by Making It More Responsive and Suitable for All the Mobile Screens as Well.

We Will Also Add a sample Video of How to Use Our Webpage in The Main page By Which Users Can Easily Learn How to Use Our Online Compiler.

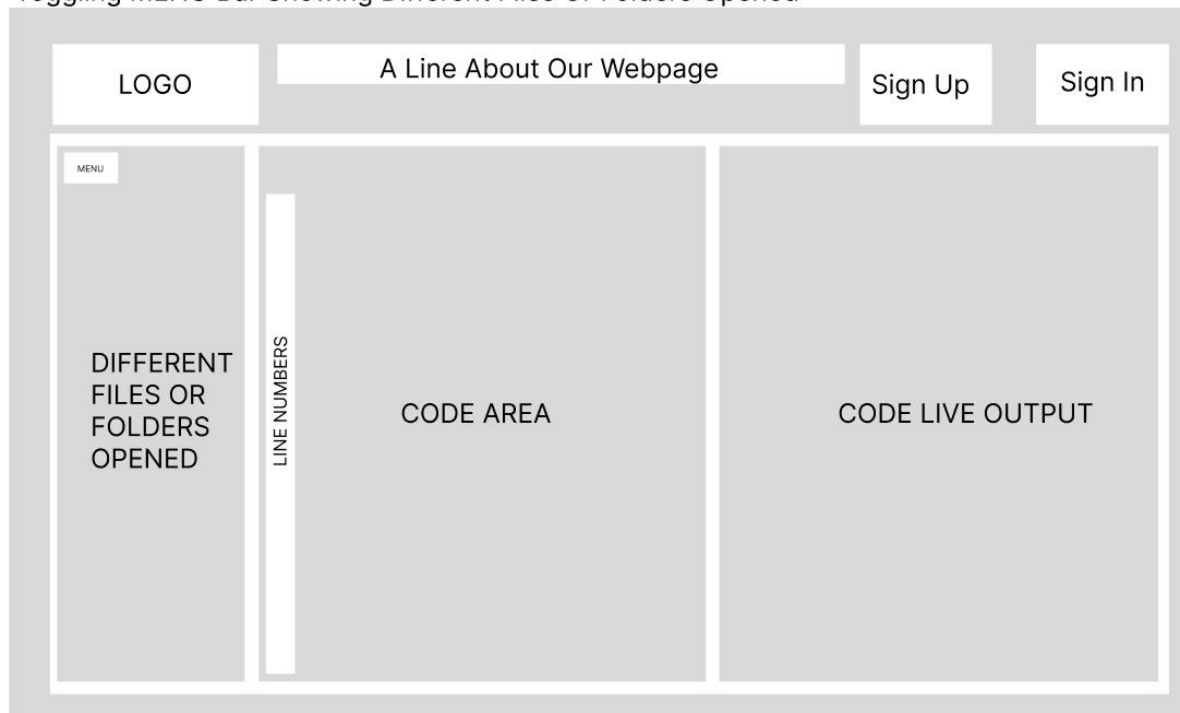

We Are Also Aiming to Add a Save Button If the User Has Created Account Which Stores the Code in Our Data Base.

#### CODING PAGE

We Are Also Aiming For Adding A Toggling Menu Bar Which Will Be Used To Display The List Of Files Or Folders Which The User Is Currently Opened And Using It.

## Toggling MENU Bar Showing Different Files Or Folders Opened

## EXPECTED OUTPUT:
